Example with table from Python

Koenraad De Smedt

September 18, 2023

This is a small example document with a table. Table 1 contains some computer terms in English with Norwegian equivalents (or the other way around). The table was sorted and styled in Python from a Pandas dataframe that was created from a dict. This example illustrates how a styled dataframe can be written to file in LaTeX format, which can therefore be directly imported into a document. In order to refer to the table, assign a label when writing the table from Python.

Table 1: Translation of terms

norsk	english
betingelse	condition
dataramme	dataframe
gjentagelse	iteration
glidelås	zip
inklusjon	comprehension
innrykk	indentation
krysstabulering	cross-tabulation
linjediagram	line plot
løkke	loop
nøkkelord	keyword
regulært uttrykk	regular expression
rekke	sequence
rekke	range
sett	set
slå sammen	concatenate
stolpediagram	bar plot
tabell	array
tokenisering	tokenize
verdi	value
